OLORUNFEMI JOHN

Software Engineer | React, Next.js, TypeScript and Full Stack Web Apps

Lagos, Nigeria | +2349039487306 | theregalstarlite@gmail.com
Portfolio: thegoodb0rg.pages.dev: https://thegoodb0rg.pages.dev | GitHub: theGoodB0rg: https://github.com/theGoodB0rg | LinkedIn: john-olorunfemi: https://linkedin.com/in/john-olorunfemi

PROFESSIONAL SUMMARY

Software Engineer with 3 to 5 years of experience building and shipping production React and Next.js applications, including three live products: a commercial AI proofreading app, a JSON data tool that processes 100MB files in the browser, and a fintech marketplace for trading music rights. Strong in TypeScript, REST API integration, client-side performance, and clean component architecture. M.Sc. Cyber Security graduate from the University of Ibadan with a security-first approach to web engineering. Every project listed below is live and links are included.

TECHNICAL SKILLS

Frontend Frameworks: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST API Design, LLM API Integration, PostgreSQL, SQL Server, Prisma

Product & Deployment: Vite, Vercel, Cloudflare Pages, Git/GitHub, GitHub Actions, Performance Optimization (100/100 Lighthouse)

Security: OWASP Top 10, Secure Authentication, Client-Side Sanitization, WCAG 2.2 Accessibility

PROFESSIONAL EXPERIENCE

UtilityFirst | Technical Lead / Architect

2025 - Present | Remote

- Lead technical strategy and system architecture, translating product goals into working full stack platforms built on React, TypeScript and Node.js.
- Own delivery end to end: specification, stack choices, implementation, deployment and iteration.

AudioEye | Web Accessibility Engineer (Contract)

2026 | Remote

- Audited and fixed enterprise websites for WCAG 2.2 compliance, keyboard navigation and screen reader support.
- Built dynamic client-side JavaScript fixes in real time for focus traps, contrast issues and ARIA bugs without access to client source code.

Independent Developer | Freelance Web and AI Solutions

2020 - Present | Lagos

- Designed, built and deployed full stack web apps and AI-powered tools for clients and my own product launches.
- Handled requirements analysis, architecture planning, implementation and deployment for every project.

FEATURED PROJECTS (ALL LIVE)

Dainty Proofreader | Commercial AI Writing App

Live: https://daintyproofreader.com

React, JavaScript, Node.js, Streaming LLM APIs, Payment Integration, Tailwind CSS, Vercel

- Built and shipped a commercial, subscription-based AI proofreading app where users edit text and get grammar, tone and clarity suggestions in real time.
- Integrated streaming LLM API responses with live inline diffing so users see corrections as they are generated, keeping feedback under a second.

- Own the full stack: React frontend, Node backend, LLM orchestration, subscription payments and deployment on Vercel.

JsonExport | High-Throughput In-Browser Data Tool

Live: https://jsonexport.com | **GitHub:** https://github.com/theGoodB0rg/json_hub

Next.js, TypeScript, React, Tailwind CSS, Monaco Editor

- Built a client-side tool that parses, flattens and exports nested JSON payloads up to 100MB directly in the browser with zero server roundtrips.
- Integrated the Monaco Editor and a virtualized data grid, exporting to CSV, Excel, HTML and ZIP instantly.

49Blox | Full Stack Fintech Marketplace

Live: https://49blox.com

React, Node.js, REST APIs, Real-Time Pricing

- Built the frontend and API integration for a marketplace where fans buy and trade fractional music rights, including a live orderbook and portfolio dashboards.
- Worked across the team to turn complex financial transaction flows into simple, fast user interfaces.

EDUCATION

M.Sc. Cyber Security (Second Class Upper) | University of Ibadan (Awarded 2026)

B.Sc. Computer Science (Second Class Upper) | Kogi State University (Graduated 2023)
